Volvo S60 Launch On March 10

Volvo will launch the S60 in India on the 10th of March, 2011. The company will bring in the S60 as a CBU and will price it competitively against the Mercedes C-Class, BMW 3-Series and Audi A4. The new S60 range will be available from launch with a choice of a diesel and petrol engine. The petrol motor has a 3.0 liter T6 heart with 304bhp of power and 446Nm of torque. The diesel engine will be the famous 5-cylinder 2.4 liter 205bhp D5 with 420Nm of torque. These powerplants will ensure a sub-7 seconds 0-100kmph sprint and a top whack limited to 250kmph. The S60 will be high on safety just like all Volvo's are.
