Volvo To Launch XC60

Swedish luxury carmaker Volvo said that it will enhance its product portfolio in the country, including a premium sports utility vehicle to be launched sometime next year.

"The company is not facing any slowdown in the segment and is planning to introduce another SUV, XC60, in India after its European launch in November this year. We are internally preparing for the homologation process and will launch the car accordingly then," Volvo Car India Managing Director Paul de Voijis said.
