# **Complete Coverage Of 2010 Auto Expo**

We just concluded our coverage of the [2010 Auto Expo](#), which was a fantastic extravaganza of the most happening automobiles in the country. With more than 80 posts and close to 800 pictures, the Auto Expo has kept us on our toes. But we are glad we could make the readers feel as if they were present at the Expo themselves. The 2010 Auto Expo was a huge success, with participation from almost every global and local car maker. A few cars (like the Toyota Etios and Honda Brio) made their world debut at the Expo as well. The Auto Expo was organized by CII, SIAM and ACMA and they did a fantastic job of putting up an amazing show. If you missed it, never mind as we have covered each and every vehicle in detail from the show.
