# **Martin Jetpack Get You Airborne**

The Martin Aircraft Company has created jetpack which can be bought by anyone who can pass the company's own internal training sessions. The Ultralight jetpack uses a 2.0-liter V-four two-stroke engine that drives twin carbon/kevlar rotors and requires no pilot license. With 600-pounds of thrust, Martin claims its Jetpack can accommodate pilots up to 280 pounds and is expected to cost as much as a high-end car or motorcycle. The five gallons of fuel carried onboard will take you 31.5 miles in any single direction.
