**Tell us about yourself. Who you are? What you do?**

I am Sunil Konjaril, a professional automobile designer who has some serious psychological problems as the only things I think about an live about is cars and bikes. I am very passionate about modifying cars and bikes as I think OEM's are good but I can still make something better out of them. I used to spend my college times all four years in a workshop and worked there, Opening up cars and bikes and got to learn a lot about them.

**When and how did your love for cars/bikes or both start?**

**When did you buy your car/bike?**

My dad brought me my CBZ in college which I still am very proud of, Rest all the cars I brought them myself. I spent all my earned money on cars and didn't even save a penny! And I totally don't regret that!

**What made you buy this particular car/bike?**

Opel Vectra 2.2 I personally think which other car in that segment provides me with all that technology which even C classes or 3 classes didn't have at that time!

Contessa- Purely and purely to modify nothing else. I have been working on a full restyled fiberglass body car since last September. Will be soon completed in 2 months .

Mercedes S-Class. 5 litre monster v8, electrical seats , plush luxury need I say more??

**How many kms have you done? How many do you do everyday?**

Again can't say exactly. My office is 40 kms up-down everyday so I think I might be doing around 2000kms every month given a few kms here and there

**What do you love the most about your car/bike?**

Fast, Fast (that's not a typo), big, luxurious, and make me feel that I should live in them rather than in an apartment.

**What you don't like about your car/bike?**

Nothing! I love them If I say anything it will be like I am cheating on them J
