Inflatable Car Garage

The Car Capsule is the most cool and mobile way of parking your car. It is a clear, vinyl, flame-retardant and anti-static bubble. It keeps all of those grubby hands off your vehicle, but still allows you to show off that 10-hour wax job you did last Sunday.

The eight-foot version is available for \$269 with the 22-foot mega-sized version going for \$419 (around Rs. 22500). Kind of value for money if you take into consideration the quality and mobility it offers.
