Maruti Kizashi Spotted In India

The Suzuki Kizashi has been spotted at Pune, which makes us believe that the car will be launched very soon. Pune is the home of ARAI, and in all probability, the car is being homologated for the Indian market. Maruti plans to position the Kizashi in between the Civic and Accord at a price tag of Rs. 17 lakhs. The car is expected to be feature rich with the USP being its sportiness and value for money. Hopefully a diesel variant will follow soon enough before the Kizashi is ruled out like the Grand Vitara.
