# **Skoda To Launch Fabia Scout In India?**

Although Skoda does not have many cars in its portfolio (just 4 of them), the company does manage to remove a lot of variants from each and every model. The company is testing its Fabia Scout in and around Pune, which makes us believe that they plan to launch the variant some time in this year. The Skoda Fabia Scout is an off-road-inspired edition of the Fabia hatchback, which features bigger wheels, wider tyres, four wheel drive system and the likes. The crossover could make its way to India soon with a more powerful version and a heavier price tag. Would you buy one?
