Suzuki To Launch Hayabusa & Intruder

After the launch of the Yamaha superbikes the R1 and MT01 other bike manufacturers have expressed their desire of launching superbikes from their stable as well. Suzuki has been planning to launch its sports bikes since quite some time now. Finally Suzuki will be launching two superbikes in India officialy on the 26th of this month.

Suzuki will be launching the hyper sports bike the Hayabusa and sports cruiser the Suzuki Intruder. The Hayabusa is well known for being the first bike to break the 300 kmph barrier. It was used in Dhoom as the getaway bike ridden by John Abraham. We expect Suzuki to price the bikes very competitively so as to give direct competition to Yamaha's super bikes.
